

REACH NEW HEIGHTS WITH A
VERTICAL PLATFORM LIFT

Based in Sarasota, FL, Harmor is a leading manufacturer of stairlifts, vertical platform lifts, and wheelchair and scooter lifts for automobiles. Inspired by those with limited physical mobility, we are driven to create mobility and accessibility products that allow people to go where they want, when they want, and how they want.

Founded in 1998, we continue our mission of innovation to increase independence and improve the quality of life for millions of people who are mobility-challenged. We constantly strive to evolve and update our product lines to accommodate our growing clientele.

YOUR HOME. YOUR FREEDOM. YOUR WAY.

1 of every 5 falls causes broken bones or head injuries.

In 2023, 34% of seniors reported feelings of isolation.

23% of U.S. adults have arthritis. And 24 million adults are limited in their activities due to arthritis.

THE HARMAR DIFFERENCE

We believe in supporting you on your journey. Our products are proudly designed and assembled here in the U.S. to help you and your loved ones enjoy freedom, independence, and dignity.

First-rate Customer Service and Support

We stand behind our products to ensure your safety and happiness with your lift. Harmor offers the best support in the industry with our LiftSquad service network, training, and support. Our 3-year transferable warranty (or limited lifetime warranty with the SL600) provides flexibility.

Safety & Testing

All of Harmor's products are subject to intense testing by subjecting the product to several times its rated load, plus life-cycle testing at or above industry standards. We take pride in knowing that our products exceed quality expectations and are more than ready to lift your life in multiple ways.

Comprehensive Dealer & Service Network

Harmor has thousands of dealer locations across North America, which helps make our products available when and where you need them. To ensure you're choosing the best lift possible for your needs, our dealers provide assessment services, installation, and routine maintenance and service. Most of our dealers are LiftSquad-certified, meaning they are factory-trained on our products, undergo routine background checks, promise to train you and caregivers on the installed product, and provide the utmost respect to you and your property. They go above and beyond to give you the best service possible.

VERTICAL PLATFORM LIFTS

Coming and going from your home as you please is vital – not just for your safety, but for your wellbeing. For some, vertical platform lifts can be the perfect tool to help transport not only you but your mobility device from decks, porches, or garage entries, down.

Why Vertical Platform Lifts?

**Heavy-duty Lifting
Capacity up to 750 lb**

**Wide Variety of Dimensions
for Virtually any Lifestyle**

**Great for Indoor or
Outdoor Applications**

HIGHLANDER II

Designed to safely lift you and your mobility device, the Highlander II is a prime choice for heights up to 14'. This VPL's lifting capacity can accommodate up to 750 lb and offers five different platform sizes to best fit your needs. Equipped with the following five innovative systems, the Highlander II delivers reliable and easy use:

1. Guardian System

Made of four LED lights that provide continual performance feedback through a series of easy-to-follow codes.

2. ReadyUPS

An optional "Battery Backup" system that automatically activates in the event of a power outage.

3. SmartSense

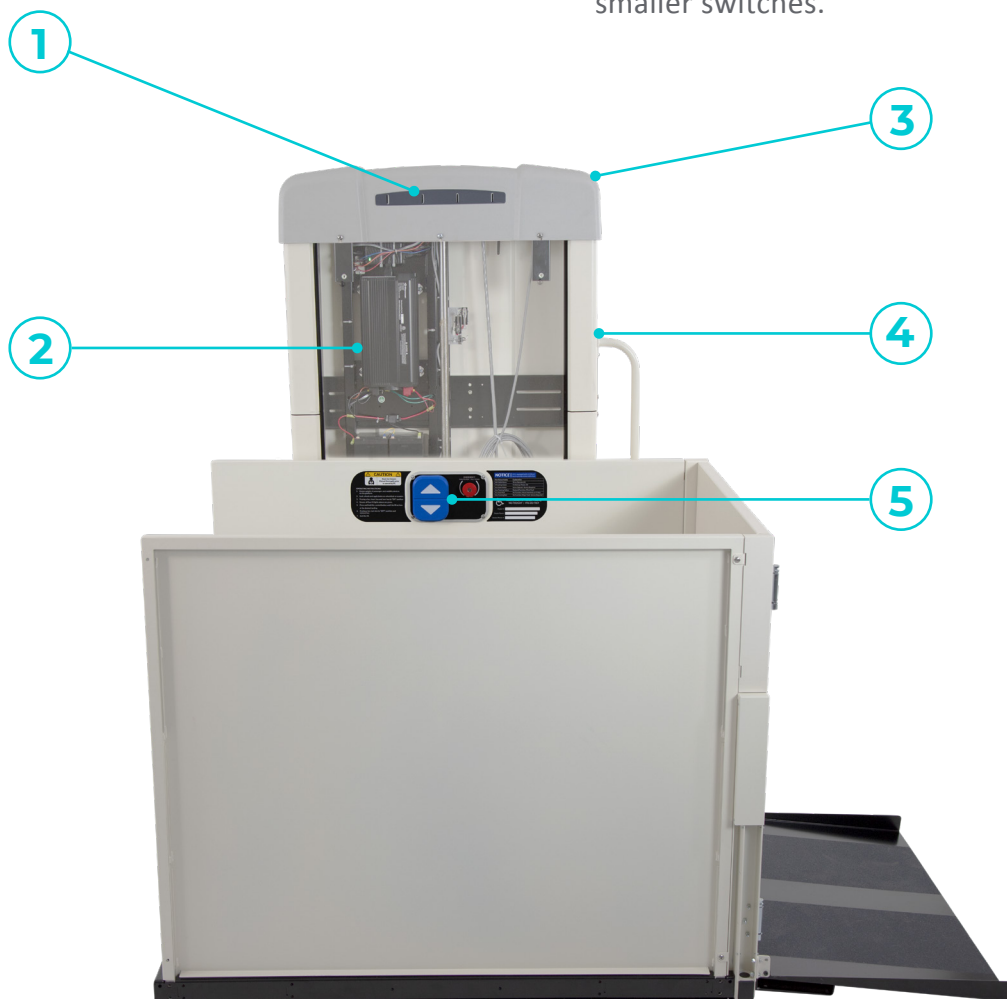

A PC board designed to monitor motor temperature, cycle count, and battery status.

4. Steady Drive

A high lead ACME screw used to provide a smoother, steadier ride.

5. Big Blue Paddle

Easy-to-use, larger paddles instead of smaller switches.

VPL WITH ENCLOSURE KIT

Save money on an elevator with Harmar's VPL with Enclosure Kit! The Enclosure Kit can accommodate virtually any Highlander II configuration and does not limit any of the options or features offered with the VPL.

Harmar's Enclosure Kit is a great solution and helps avoid extra construction costs and, in some cases, permits. Please note that all units with a landing height over 60" must be enclosed by code (Safety standard ASME A18.1-2020 for Platform lifts and Stairway Chairlifts).

VPL400-X

Great for garage entries, this simple-yet-sturdy lift is packed with the same lifting power offered by the Highlander II. Best for entries up to 53", this lift comes complete with both the Steady Drive and the Big Blue Paddle.

VPLX-DC

Built for reliability and simplicity, this lift runs entirely on four onboard batteries—no AC power needed. Its 48-volt system ensures smooth, uninterrupted operation, while plug-and-play wiring and a tower-mounted disconnect make installation fast and hassle-free. Just plug into a standard GFCI outlet and go. Available in 4- and 6-foot models, it's ideal for Agency, VA, and garage applications.
